INTRODUCTION

- A system that would provide an automated framework for recruiting.
- An optimized and systematic managerial process for selecting candidates.
- Based on the qualifications and requirements the qualified applicants would be automatically sorted in the system.

CONCLUSION

- This recruitment workflow ensures that all roles involved in the hiring process—Admin, TL, PM, HR, and IR—are clearly defined and efficiently coordinated. By establishing a structured process where each role has specific responsibilities, the organization can streamline job postings, candidate evaluations, and interviews. This approach not only improves the efficiency of the recruitment process but also enhances the quality of candidate selection and overall hiring outcomes.

ACKNOWLEDGEMENT

We extend our heartfelt thanks to our project supervisor, for their invaluable guidance and feedback. Our gratitude goes to Mindgate Solutions for providing the necessary resources and support. Special thanks to the [specific departments or individuals] for their timely assistance and cooperation. We also appreciate the encouragement from our colleagues and peers. Lastly, we are grateful to our families and friends for their unwavering support and understanding throughout this project. Thank you all for your contributions and support.
